

# BRITTANEY PERRY-MORGAN

Enterprise Project Management · AI Enablement Strategy · Prompt Engineering

Lowell, AR | (678) 358-7624 | bperrymorgan@me.com

## PROFESSIONAL SUMMARY

Senior IT Project Specialist and AI Enablement Strategist with 8+ years of enterprise project management experience and a career-long focus on working smarter. Long before AI became an organizational priority, I leveraged automation tools and process optimization to reduce inefficiencies and deliver measurable results. That foundation now supports a focused specialization in enterprise AI adoption, program design for enablement, and prompt engineering. Currently part of the core team behind Tyson Foods' enterprise-wide "All in on AI" initiative, building the frameworks, governance structures, and training content that help a 40,000+ team member organization adopt AI at scale.

## CORE COMPETENCIES

- Enterprise AI Enablement & Adoption Strategy
- Prompt Engineering (Multi-Framework)
- AI Opportunity Identification
- Jira Backlog Governance
- RACI Modeling & SOP Authorship
- Data Workflow Automation
- Program & Project Management
- Agile / Scrum / Kanban
- Enablement Content Development
- SharePoint Architecture & Governance
- Cross-Functional Stakeholder Alignment
- Training & Change Management

## TOOLS & PLATFORMS

AI & LLM Ecosystem	Microsoft Copilot + Studio, Claude, Ollama, OpenClaw, OpenCode, Codex, Mistral Vibe, Multi-Agent Orchestration
Prompt Engineering	System Prompt Architecture, Multi-Framework Design (GCSE / RISEN / COSTAR), Enterprise Prompt Library
Project Management	Jira, Clarity PPM, Smartsheet, Agile / Scrum / Kanban, Waterfall
Power Platform	Power Automate, Power Apps, SharePoint Online, Microsoft 365 Admin
Platforms & Tools	GitHub, Google Cloud Platform, Workday, Notion, Canva
Development	Python, Java, PHP, JavaScript, React, Next.js, Django, HTML / CSS, SQL, Google Apps Script

## WORK EXPERIENCE

**Tyson Foods** Springdale, AR

July 2024 – Present

Senior IT Project Specialist — AI Enablement Team

Core team member executing Tyson Foods' "All in on AI" initiative, serving 40,000+ team members.

### AI STRATEGY & OPPORTUNITY IDENTIFICATION

- Identify and scope AI use cases across enterprise functions, translating business pain points into structured adoption roadmaps with defined implementation paths.
- Partner with IT and business stakeholders to define responsible AI usage standards, identify governance gaps, and formalize them into documented policy guardrails.

### PROMPT ENGINEERING & ENABLEMENT CONTENT

- Develop the enterprise prompt engineering curriculum using the GCSE framework, producing training materials that drive consistent AI usage across technical and non-technical employee groups.
- Author and maintain Microsoft Copilot enablement content, including use-case playbooks, scenario-based prompt guides, and troubleshooting documentation distributed via the enterprise AI SharePoint hub.
- Design and publish SOPs and implementation blueprints that break AI strategy into phased, actionable work packages for cross-functional teams.

### AI SHAREPOINT HUB & GOVERNANCE

- Contribute to the architecture of the enterprise AI Enablement SharePoint site serving as the central resource hub for training, governance, and adoption guidance, and maintain content governance frameworks covering access controls, versioning, and lifecycle management.

### PROGRAM MANAGEMENT & DELIVERY

- Own the AI Enablement Jira backlog end-to-end, managing intake, grooming, and prioritization across Epics, Features, Stories, and Issues.
- Maintain cross-functional alignment through structured status reporting, working session facilitation, and same-day conversion of stakeholder decisions into tracked Jira tasks.

Senior IT Project Specialist — Digital Enterprise Office, Emerging Technology & AI

**CROSS-FUNCTIONAL PROJECT DELIVERY**

- Led cross-functional teams to manage and deliver projects focused on business optimization and technical solutions within the emerging technology and AI portfolio.
- Applied project management methodologies (Agile, Waterfall) to ensure projects were completed on time, within scope, and within budget.

**Northwest Arkansas Community College** Bentonville, AR

Mar 2024 – Jun 2024

Systems Analyst — IT Enterprise Applications

- Led Workday ERP customization across Student Services, HR, and Finance modules, identifying system gaps and configuring solutions to improve operational accuracy.
- Produced comprehensive system configuration documentation that reduced configuration drift and accelerated team onboarding.

**Dark Horse Comics Inc** Milwaukie, OR (Remote)

Jul 2023 – Jun 2024

Software Development Intern

- Contributed to mobile and web development projects across the full software delivery lifecycle, gaining hands-on experience with production codebases and enterprise delivery standards.

**United Power and Control Systems LLC** Houston, TX (Remote)

Jul 2021 – Nov 2023

Senior Project Manager

- Directed end-to-end delivery of large-scale IT projects, maintaining scope, budget, and schedule integrity while sustaining high client satisfaction across a remote delivery model.
- Led cross-functional teams through full project lifecycles, implementing structured tracking and communication workflows that consistently met critical delivery milestones.

**AUTOMATION & SYSTEMS IMPLEMENTATION**

- Oversaw the automation of data workflows using Google Apps Script and Python to streamline business processes and reduce manual effort.
- Planned, implemented, and introduced new systems and technologies with a focus on stakeholder communication and cross-functional alignment.

Software Development Intern (January 2023 – May 2023)

- Built a full-stack internal employee portal as a Capstone Software Engineering project using Django, JavaScript, and HTML/CSS, delivered on time through full Agile lifecycle management.

**Wachter Inc** Lowell, AR

Feb 2017 – Jul 2021

Project Manager I | Dispatcher

- Managed electrical and low-voltage installation projects, ensuring compliance with industry standards while introducing custom tracking tools that improved portfolio visibility and accountability.
- Coordinated field logistics and multi-site resource deployment, maintaining systematic documentation that supported operational reporting and team accountability.

**E D U C A T I O N**

**B.S. Software Development**

Expected May 2026

Bellevue University — Bellevue, NE

**Business Analytics & Operations Certificate**

January 2025

Pathstream (Virtual)

**Full-Stack Software Developer Certificate**

May 2024

University of Arkansas — Fayetteville, AR

**A.A.S., Computer Information Systems (Cum Laude) | A.G.S.**

May 2023

NWACC — Bentonville, AR

**M I L I T A R Y E X P E R I E N C E**

**Petty Officer Third Class**

Aug 2010 – Nov 2015

United States Navy Reserve — Tulsa, OK
